

# IE Settings for Excel Format Reports

Select **Tools** → **Internet Options** from the main IE screen. Click on the **Security** tab as shown below. Click on the green check mark for **'Trusted Sites'** and add [http://\\*.d2sc.com](http://*.d2sc.com) and [https://\\*.d2sc.com](https://*.d2sc.com) as trusted sites.

Click on the **Custom Level** button at the bottom of **Security** tab, then scroll down the listing of the **Security Settings** until you see the **Downloads** section. There are 3 options under **Downloads**.

*Make sure that all 3 are **ENABLED** (Automatic prompting for file downloads, File Download, and Font Download).*

Click **OK** to save, then **OK** again on the Internet Options screen, then **restart** Internet Explorer. When choosing the Excel format for a report, you should now see the following INSTEAD of the warning about IE blocking the download (you can click on Open to open in a window or Save to save the file to your PC).
