<u>Field Trip Guidelines</u>

<u>Teacher Agreement</u>

The school nurse will prepare containers for the students going on a field trip. As the person who is dispensing the medication, I understand that my responsibility in giving this medication is to match the child with the correct container or inhaler and observe the child taking the medication. If there is a question about the correct child, medication, or dosage, I will call the nurse and follow her instruction or not give the medication and return it to the school nurse after the field trip. All the containers (full or empty) and inhalers will be returned to the school nurse so an accurate recording can be made on the medication log.
