

Health Services

Growth and Development – 6th Graders

Date: _____

To Parent/Guardian of: _____

We are pleased to announce a program conducted by Health Services impacting all 6th grade boys and girls. “Puberty, The Great Adventure for Girls and Boys” is a film presentation developed for middle school students portraying kids. It is an effective treatment of puberty through matter-of-fact, supportive explanations of male and female body changes. The nurse will present this program to boys and girls in separate sessions with adequate medical counsel available from the school nurse.

This program complements TEKS (Texas Essential Knowledge and Skills) for 6th graders. It has been reviewed and approved by the Health Advisory Committee, the Middle School Principals. You can be assured that this course will not violate your rights as a parent. We will provide a parent preview of the film at your request.*

The books for boys and girls and copies of the film are available in your school library for your checkout viewing. Books will also be available at the parent preview.

School Nurse

Principal

*Notify your school nurse if you want to preview the films.
