

Date: _____

To Parent/Guardian of: _____

One of the following videos will be viewed by all the 4th/5th grade boys: "Boys Stuff", "Always Changing", "Growing Up and Liking It", "Just Around the Corner - for Boys", "New Improved Me-Accepting Body Changes", and "New Improved Me-Understanding Body Changes". They were developed for preteens and young teens to help them cope with puberty through matter-of-fact, supportive explanations of hygiene and body changes. These videos examine the physical changes boys experience during puberty anticipating questions about voice changes, body hair, etc. The presentations emphasize that although developmental timetables vary, the person who emerges will be someone they like very much.

This program complements TEKS (Texas Essential Knowledge and Skills) required for 5th grade students. It is presented in a professional manner and does not constitute a sex education program. We will provide a parent preview of the film at your request. *
