French 2 A and B – CR Only

Algebra 1B Trailer Course
In person at Richland HS
June 1-21, 2021
Free of charge
Must currently be enrolled in Alg 1A w/ Coach Wells

Courses:

1. Summer courses are at least 40 hour courses for each course. It is not recommended to take more than 2 semester courses during the summer term.
2. If a student athlete is planning to become NCAA eligible, he/she must take the original credit version of any online course even if they are taking the course for credit recovery.
3. Students who successfully complete their online original credit or credit recovery course (100% completion) earn the grade they make at the completion of the course.
4. **All** grades will be posted on the student's transcript which will be calculated into the student's GPA. (Unless the student is an entering freshman for school year 2019-2020. (See new GPA policy.)
5. If a student does not successfully complete the course (not 100% complete) he/she will earn whatever final grade will be given for that course. Non completion is the same as failing the course.
6. Parents will get a daily email from Edgenuity informing them of student progress and grades.
7. For the original credit courses for Chemistry, Physics, IPC or Environmental Systems – there will be a lab component. Labs are **NOT** optional.
8. A one day CPR training is required for students taking Health online. The date will be determined between you and your teacher. Details will be given during class.
9. **All students must complete a short but mandatory sign-on training to get started.**

After you have completed registration in RevTrak, you will receive an email containing a link for Summer School Orientation/Sign on Training. Once orientation is complete, you will be added to the courses in Edgenuity.

*= Tested subject. Students can only enroll in Edgenuity summer school if passed the STAAR EOC exam
