

How do I connect my computer to a mounted projector with document camera?

- 1) Your computer connects to the input of the splitter.

- 2) Video in is from Computer using a special cable.

3) Expanded view of custom VGA cable from computer to splitter input

4) Normal VGA cable hooks up wall outlet and monitor

5) The other **Output** from Splitter goes to the **Input** on the doc camera

6) Connect the **output** from the document to the wall plug (or the projector)

Standard Doc Camera Set up
